Subject: FEAD Weekly SFIREG

Hey Q,
Below is the SFIREG FEAD weekly – I'll be in the office tomorrow, let me know if you want me to change anything.

Thanks,
Emily

State FIFRA Issues Research & Evaluation Group (SFIREG) Full Meeting

On June 3-4, 2019, FEAD facilitated the meeting of the full SFIREG. Highlights included: a discussion about the 2019 growing season for over-the-top dicamba; a presentation regarding concerns related to pesticide use on hemp; a discussion concerning the uses of unmanned aerial vehicles (UAVs); and, an update on the states' Section 24 (c) registration concerns. SFIREG regional representatives and other associated organizations (e.g., lab directors, the Association of American Pesticide Safety Educators (AAPSE)) provided the committee with updates on recent activities and concerns. SFIREG also discussed and approved the following documents for further action: a cover crop issue paper, a white paper on the future of Pesticide of Interest National Tracking System (POINTS), a letter to OPP on state-established "action levels" for crops like cannabis, a letter to state lead agencies and feed regulators on pass-through insecticides, a white paper on devices making public health claims used in healthcare, and a survey on state device regulation.
